

QR Codes Give Readers Easy Access to Information

City Spectrum is making it easier for residents, visitors and businesses to stay informed by featuring quick response (QR) codes. Smartphone users simply scan these codes for access to more city news, photographs and videos. To read the code, download a free mobile app at <http://i-nigma.mobi/>. Scan the QR code at left to view a video about the new West Irving Library. Standard messaging and/or data rates may apply based on an individual's smartphone data plan.
